

Kool Pack PLUS!

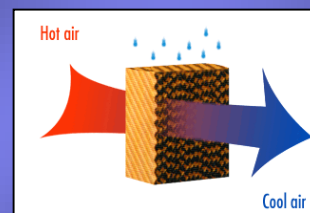

When you're looking for Evaporative Cooling - **PLUS!** *Higher Efficiency and Longer Life*

Kool Pack Plus! is the high density evaporative cooling pad that provides more cooling efficiency per cubic foot.

Because all **Kool Pack Plus!** media comes with the following:

FEATURES & BENEFITS

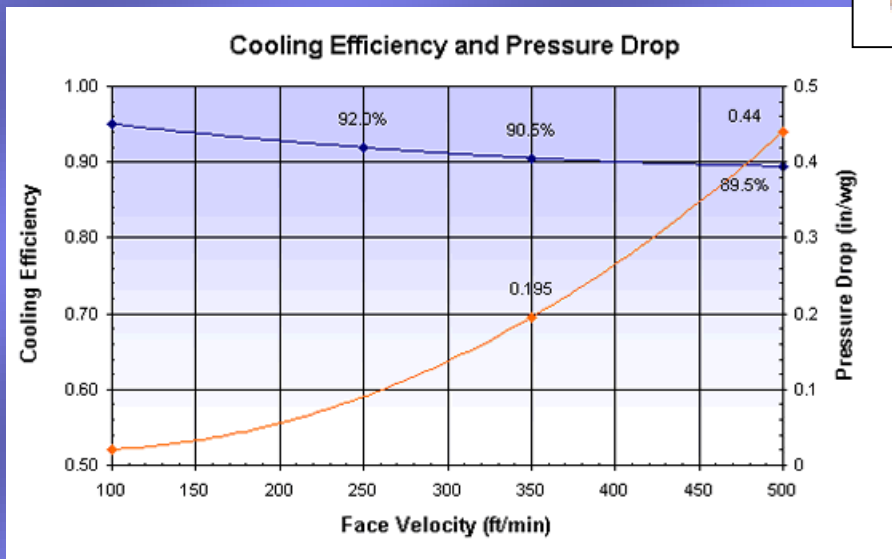

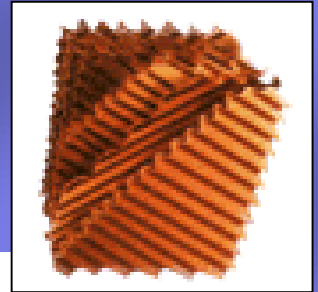

- 70 sheets per cubic foot (in 45-15° or 45-45° preformed sheets)
- Impregnated with Advanced Resins and Additives for extra strength and durability
- Cools up to 10° F more
- 4 Times the Service Life of Standard Fiber Pads
- Protective **Edge Coating** (designed for easy cleaning)
- Anti-Mold Agents
- Easy to install and maintain (virtually maintenance free)

All **Kool-Pack Plus!** Evaporative Cooling pads are made of highly absorbent quality cellulose Kraft paper formed and impregnated with Thermosetting Resins and additives to resist degradation. **Kool Pack** manufactures all its Evaporative Cooling Pads with extremely exact, engineered angles that provide the end user with highly efficient, virtually maintenance free cooling at a cost effective price.

Kool-Pack and Kool Pack Plus! comes in all Standard Sizes for the following:
