Multi- Pocket (Bag) Filter

DRB Industries Multi-Pocket Bag Filters are made of Synthetic Media in 45%, 65%, 85%, & 95% ASHRAE efficiencies. They are non-carcinogenic and resistant to abrasion, moisture and microbial growth. Extruded aluminum pocket separators support the pockets and allow for effective airflow. All pockets are ultrasonically sealed to prevent leakage and tearing. Cover strips seal the gap between the pockets and eliminate the possibility for air and dirt bypass. Each filter has tremendous burst pressure protection and is rigidly constructed.

Available in 3 pockets to 12 pocket sizes. Gasketing is available on the back, sides, and face of the header at an additional charge. Support loops are also available. Please specify when ordering.

Maximum Temperature	150 ° F	Relative Humidity	100%
Flammability	UL 900 CL 2	Recommended Final Resistance	1.5" w.g.
Filter Media	Synthetic	Burst Strength	25" w.g.

Efficiency	MERV Rating	Air Flow (cfm)	Initial Pressure Drop ("w.g.)
40% - 45%	9	2000	0.20"
60% - 65%	11	2000	0.28"
80% - 85%	13	2000	0.31"
90% - 95%	14	2000	0.34"

Available in different widths, heights, & depths.
Widths – 12", 20", 24"
Heights – 20" & 24"
Depths – 12", 15", 18", 22", 24", 25", 30", & 36"
(Call for special sizes.)
