Polyester Pads & Rolls

Polyester Pads & Rolls

DRB Industries LLC offers many different **Pads and Rolls** designed for your application. All our high loft medias are multi denier (fibersize) blends – our medias are gradient density. This means larger fibers on the air entering side provide high dust or paint holding capacity combined with smaller fibers on the air exit side for **high efficiency**.

Low Pressure Drop and High Dust Holding Capacity

3 denier = small
40 denier = large

Specifications

Part #	Size	Media	Denier Blend	Description
PP½WD	½"	White Dry	6/15	Good "roughing" media
PP½YT	½"	Yellow Tackified	3/6	Cost effective, high efficiency
PP1BW	1"	Blue/White Tackified	3/6/15	High efficiency & dust holding
PP2YW	2"	Yellow/White Tackified	6/15/40	High efficiency & dust holding
PP1WP	1"	White Paint Arrestor	15/40	Comes with a heavy binder, Superior paint holding and efficiency for viscous or thin paints
Dimensions		Pressure Drop	Efficiency	Dust Holding Capacity
Up to 110 in wide and 135 ft long		0.27" w.g.	MERV 8	216 grams ASHRAE
