

SOFT POCKET FILTERS

Soft Pocket Filter

UNIQUE DESIGN

- Soft Pocket Filters have a uniquely designed **extruded aluminum frame** for increased stability, reduced corrosion and greater filter life.
- **Pocket seams are ultrasonically sealed** to prevent leakage and reduce the possibility of tearing.
- Internal pocket spacers channel the air entering the pocket resulting in **lower pressure drop** and reduced energy costs.
- **100% synthetic media** resists all types of bacterial growth.

Ultrasonically Sealed Seams Prevent Leakage

FEATURES

- Soft Pocket Filters provide excellent value, performance and durability for applications that require **medium to high efficiencies**.
- **Extruded aluminum pocket separators** support pockets and enable effective airflow.
- **Rugged construction** of extruded aluminum frame and pocket supports eliminates bending or collapsing even in turbulent operating environments which promotes even loading.
- **Non-shedding fibers** are specially designed to resist moisture and chemicals.
