**Gas Turbine  
Exhaust Stacks  
& Components**

# Gas Turbine Exhaust Stacks & Components

We supply **Exhaust Stacks** for the leading OEM manufacturers across the globe. **Since 1959** (over 50 years), our partner company has designed installations worldwide to meet the most demanding Acoustic, Structural, and Airflow requirements.

With some of the best recognized Fabrication Facilities in the industry, and Engineering and/or Sales Offices on **5 different continents**, we have the expertise to design and manufacture your new exhaust system or retrofit and repair your existing one. Our expert Engineering Tools, including **CFD analysis, Real Time Pricing, Lead Times, and Drawings** make quoting faster and easier. No other company can put together the Acoustic, Mechanical, and Structural Engineering package and Project Management that we can at such an **affordable price** and **attractive lead time**.

***Providing Exhaust Stacks & Systems for:***

**ABB**

**Rolls Royce**

**Mitsubishi**

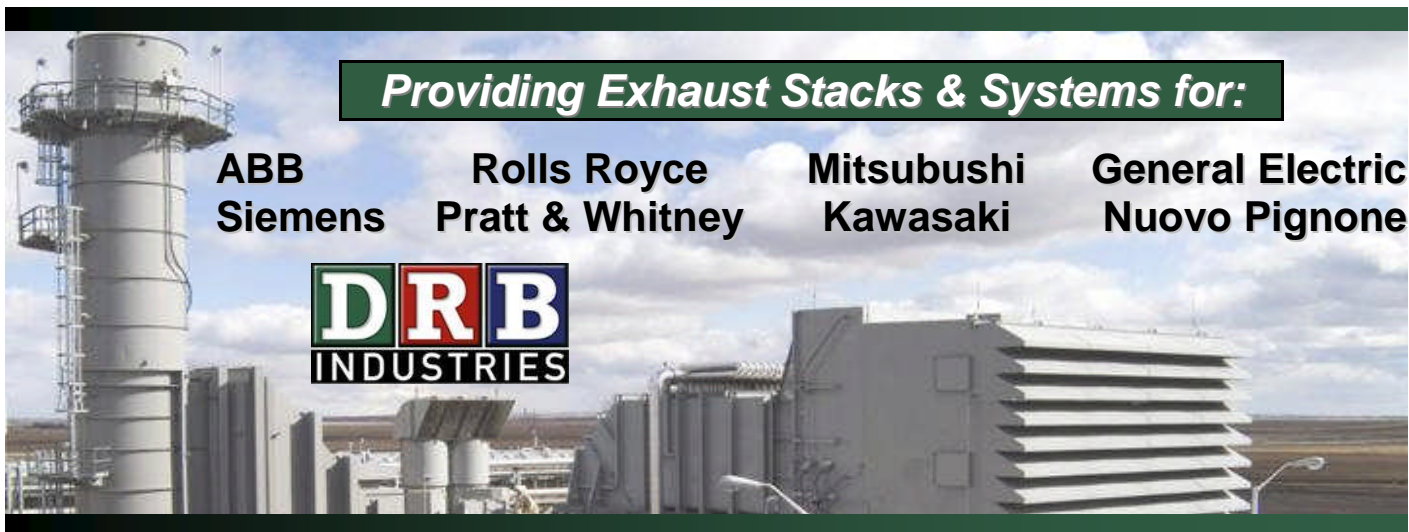

**General Electric**

**Siemens**

**Pratt & Whitney**

**Kawasaki**

**Nuovo Pignone**

## Gas Turbine Exhaust Stacks & Components

### Construction & Retrofit Services

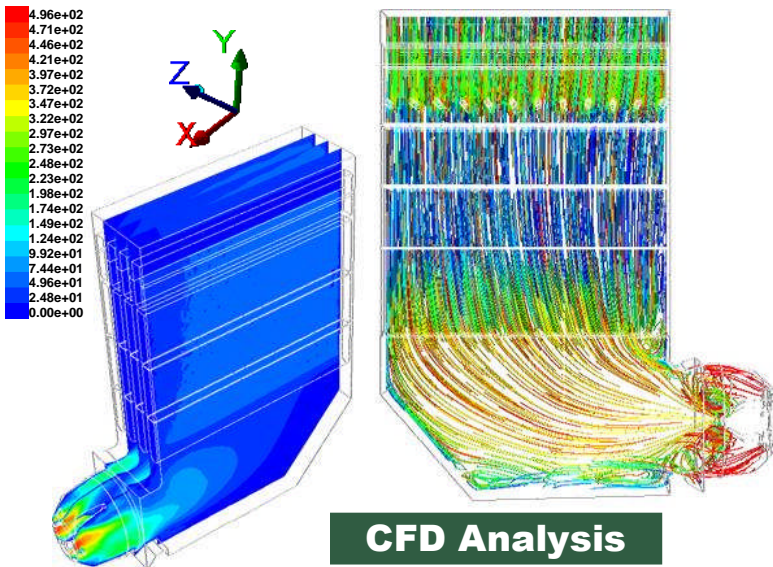

With an installed base of Gas Turbine Exhaust Systems all around the globe, our partner company has one of the largest installation bases in the world. A variety of turbine sizes are available for most OEM models. Whether retrofit repair or direct replacement, we provide the very best solution for your application.

Before

After

### Engineering Tools

Our CFD (Computational Fluid Dynamic Analysis) will allow you to have a Gas Flow Analysis to provide for less turbulence and lower  $\Delta P$  (Pressure Drop). Our “state of the art” Velocity Distribution and Stress Analysis Programs also provide you with the best acoustic performance and cycling for your Exhaust System and Silencers.
